

Why Vote for the Legalise Cannabis Alliance?

Even if you aren't a Cannabis user, legalising cannabis is still in your best interest. As our Planet's resources are rapidly running out we need to find viable alternatives.

Hemp has those alternatives with over 25,000 known uses. Make cannabis legal and we would have a sustainable source of Fuel in the form of bio-mass meaning no wars for oil, Building materials stronger than concrete, Textiles softer and more durable than cotton, Paper recyclable 7 times (unlike wood pulp paper only 3 times), plus it takes 4 times the amount of land to grow trees for paper than hemp, Food from the seeds are more nutritional and higher yielding than Soya.

Sometimes the only relief for sufferers of MS and many other ailments and diseases, historically a common herbal medicine.

So why is cannabis illegal if it's so good?

That would be impossible to answer as a good reason hasn't really been given. Although some of the evidence from experts at the time it happened does seem quite far fetched in retrospect.

"After two puffs on a marijuana cigarette, I was turned into a bat"

Dr James Munch, pharmacologist and special advisor to the Federal Bureau of Narcotics, 1938

With facts like that it's no wonder the plant was made illegal.

Laughable, Yes but nevertheless evidence used by prohibitionists to make their case against this plant that, as a race, we co-evolved with.

Whatever you feel about this issue the fact is cannabis use is a victimless crime and therefore deserves no punishment.

Cannabis cultivation, use, etc. should be in the same category as cabbage cultivation and use, although cannabis is the more useful of the two.
